

THE BIRD CLINIC VETERINARY CORPORATION

The subdermal nerves follow the feather tract patterns in birds. Injections should avoid these feather tracts (inject between them), be parallel to the keel bone and you will minimize any pain during the injection procedure.

This publication is part of The BIRD C News™ series to help educate bird owners. Produced by The BIRD Clinic Veterinary Corporation 200 S. Tustin St. #E, Orange, CA USA (714) 633-2910 www.thebirdclinic.com May be reproduced with permission only.
